Professional Summary

Senior Software Engineer with over **4 years** of experience building scalable **SaaS and InsurTech** platforms using **Ruby on Rails and Next.js**. Passionate about creating reliable software, simplifying complex workflows, and delivering practical technical solutions that support **business growth**.

Experience

Senior Software Engineer Jan 2026 – Present
DevDen *Onsite – Faisalabad, Pakistan*

- Collaborated with product stakeholders and engineering teams to design and deliver **scalable product solutions.**
- Contributed to **software architecture** and design decisions with a focus on performance and maintainability.
- Presented **technical proposals** in engineering forums, improving product design and development workflows.
- Developed product features across **frontend and backend applications**, improving performance and usability.

Software Engineer Jul 2022 – Jan 2026
DevDen *Onsite – Faisalabad, Pakistan*

- Developed backend modules and **REST APIs** for scalable workflow automation and system integrations.
- Designed database schemas and optimized **data models** for performance, integrity, and maintainability.
- Integrated **third-party services** and cloud storage solutions while supporting production deployments.
- Built **frontend components** and user interfaces, improving usability and application responsiveness.

Projects

Navigate Mar 2025 – Present
Underwriting & Risk Management Platform

- Designed **underwriting workflows** supporting risk evaluation, audit tracking, and decision support.
- Implemented **OCR-based document extraction** to automate data ingestion and underwriting recommendations.
- Developed **product features** across frontend and backend applications for underwriting and submission workflows.

AppEase Dec 2023 – Mar 2025
Insurance Submission Workflow Platform

- Implemented **RBAC and collaborator permissions** for multi-user access control on submission records.
- Redesigned **submission workflows** and frontend components, improving usability and overall user experience.
- Refactored **legacy modules** and optimized database queries to improve application performance and efficiency.

Karibu Apr 2023 – Dec 2023
Rider & Shift Management Platform

- Designed **database schemas** and data models for rider scheduling and shift allocation.
- Developed **backend modules and APIs** for rider scheduling, shift allocation, and rider management.
- Deployed and maintained applications using **Dokku** on DigitalOcean **Droplets** with DigitalOcean **Spaces** integration.

Technical Skills

Frontend	:	Next.js, TypeScript, JavaScript, Tailwind CSS
Backend	:	Ruby on Rails, REST APIs, Schema Design, Workflow Design and Automation
Architecture	:	System Design, Application Scalability, Application Performance Optimization

Education

National University of Computer and Emerging Sciences Pakistan
Bachelor of Science in Computer Science | CGPA: 3.12 *Aug 2018 – Jun 2022*
